Workplace Safety And Environmental

Inspections The Need And Purpose Of Workplace Inspections

Persons Responsible For Inspections

In terms of Section 16 of the OHS Act the CEO of the company is responsible for the company's compliance to legislation, which makes him directly responsible for inspections prescribed by law.

Occupational Health and Safety Training

The employer is obliged to provide employees with safe and healthy working conditions.

To know how safe and healthy ,or not, working conditions are, he needs to constantly monitor performance against health and safety standards and procedures as prescribed by law and company policy.

This is achieved by conducting regular safety inspections in the workplace and recording the results thereof.

On completion of this 3 day workshop the learner will be able to explain and apply safety health and environmental requirements in the workplace.

By the end of this programme, learners will be able to:

- Discuss fundamental issues pertaining to occupational safety, health and environment.
- Demonstrate an understanding of Safety Theories and Principles.
- Applying the fundamentals of Risk Management.
- Applying safety, health and environment management
